Gavin Thennes

773-787-6975 | Gthenns@iastate.edu

Professional Summary

Cybersecurity student at Iowa State University with hands-on experience in network analysis, penetration testing, server setup, and low-level systems design through academic and project-based work. Experienced in building and securing computer systems, designing RISC-V processors, and developing Android applications with backend data integration. Demonstrates leadership through supervisory roles and student organizations, with a strong foundation in Linux, security protocols, and infrastructure maintenance.

Education

Iowa State University – College of Engineering **Ames**

Bachelor of Science in Cybersecurity **May 2027**

Relevant Coursework: Spreadsheets and Databases, Software Development, Low level Circuit analysis, Pentesting, Network Analysis, Security Protocols, Linux Basics, Server setup, Server maintenance.

VOLUNTEER EXPERIENCE

- Server Moderation - Coordinated and managed virtual events (multiple times weekly with appx. 30 participants), ensuring community engagement while providing support

LEADERSHIP & ACTIVITIES

Warriors Edge Martial Arts **November 2016 -March 2022**

- Brown Belt - Assisted in training and demonstrating for lower rank members.

Information Assurance Student Group (IASG) **August 2021 - Present**

- Member

WORK EXPERIENCE

Computer Building **May 2020 – December 2022**

- Conducted market research to optimize component selection for budget and performance
- Assembled and configured custom computer systems tailored to user requirements (7 Computers, 1 Server)
- Provided technical support and troubleshooting for clients, maintaining strong customer satisfaction

Jewel-Osco **August 2022 – June 2023**

- Maintained organized and fully stocked sales floor through efficient product restocking
- Supported inventory control by assisting with receiving shipments and rotating stock
- Delivered customer service and assisted customers with product location and store navigation

PROJECT EXPERIENCE **Spring 2022 - Now**

Final Project for COM S 2810

- Designed low level RISC-V processors in code
- Designed a single cycle, multi cycle, and software scheduled pipeline

Final Project for COM S 3090

- Acted as Frontend Developer for Android app development, creating a well designed app for workout tracking
- Coordinated with other team members to develop and implement a backend data storage

Remote Robotics Automation Project Team COMS 3810

- Collaborated with peers to design and implement a remote-controlled robot
- Contributed to programming, testing, and system deployment
- Worked to troubleshoot and test hardware and software issues to ensure task completion
